

A Flat Country, with Hills

Fed up with London and my job, it's time to escape. Why not Sri Lanka, I think. That's idyllic and sunny and covered in palm trees, and half way across the world. A good place to chill.

A little research might also have revealed that it's reaching the height of an internal conflict. So probably not the best time to go and work for a peace organisation.

Let alone to take the kids.

Written in the moment and blind to the future, this is a voyage of discovery where nothing is what it seems, and the end of the journey – if it is an end – is far from where it began.
